What I can do

I am an enthusiastic and passionate JavaScript developer with an eye for design. I'm an empathetic team member with excellent communication skills. I am drawn to solving logic problems because analytical thinking comes naturally to me. I love the process of learning and taking something that feels seemingly impossible and making it a reality.

Projects

Delicious Deliveries App
- A mock full-stack Postmates clone (completed in one week)

California Surf Report App
- Surf reports from various surf spots along the coast (completed in 72 hours)
